

## DYNALINE LOAD MONITORS

Jacks Winches carry a range of Dynaline / Running line load monitors with simple adjustable audible overload alarm. Available as part of our packaged solutions or as individual hired equipment, our load monitoring equipment is tested and certified prior to dispatch. Both non-hazardous and hazardous environment equipment available we also have the facility to have line pay in - pay out measuring & Data Logging. Featuring simple installation and operation these monitors are also capable of controlling motion cut devices. HRT Models are available with standard or telemetry displays.
